

Additions to the County Hire Fleet (March 2010)

Alto Tower: This is a professional, medium duty aluminium tower, available in single or double width. Its angled locking tabs make it quick and easy to assemble, and eliminate disassembly problems caused by sections jamming together.

Rytec Log splitter: Upright, petrol-engine with 10 ton splitting force. It is equipped with adjustable tables allowing splitting of logs up to 105cm long (4'3"). The exceptionally robust construction and heavy duty hydraulic system makes the machine suitable for heavy domestic or light professional use.

Dust control Units: These are popular dust extractors. They are suitable for vacuum cleaning and source extraction from handheld power tools and small table saws. They are lightweight and portable, and come with disposable plastic bags.

Reversible Compactor Plate, Diesel-Engined: This reversible Wacker machine provides optimum performance along with a variable forward and reverse speed. An adjustable guide handle can be moved to a vertical position for operator convenience during tight turns. An optimum shock mount design reduces handle vibration, operator fatigue and engine wear. HAV rating **3.1ms**

Sliding Double compound mitre saw: This Makita saw has double sliding rails with linear ball bearings on each rail which ensures a perfectly smooth and accurate cut. Max cut more than 4 " x 12". Can cut over 4 "x 8 " at 45°. Electronic power control maintains constant blade speed under load.

Diesel-engined generator, 6kVa: This Stephill machine features an electric-start diesel engine with direct injection; high engine temperature shutdown; low oil pressure shutdown and low fuel shutdown. Integral 24lt. fuel tank giving up to 17 hours running at 75% load. A compact design and lightweight in its class at only 196Kg.

Diesel Engine Floorsaw: This Norton Clipper CS451 is a new generation of compact floor saw which combines robustness with functionality and offers significantly reduce vibration levels to the operator (by 30%), and improved operator comfort. Maximum Blade capacity 18"/450mm. Maximum cutting depth 170mm

- Cutting on right hand side only
- Frame and handlebar equipped with vibration absorbers
- Height and width handlebar adjustment
- Depth indication gauge

Material Hoists: The Genie SLA20 is a versatile, heavy duty industrial lift. Typical application is for raising awkward or heavy items into position prior to installing them. Alternatively, supporting weight and then lowering to the floor whilst equipment is being de-installed. Use one lift for smaller items; two to lift something longer, such as a steel beam.

Easy to set up and even easier to operate, these ratchet-winch machines will go through standard doorways. Working height of 6.5m; swl 363kg
